MCNAIRN CERTIFICATIONS

McNairn Packaging products are naturally environmentally friendly. With renewable resources as the basis of our product offering, McNairn has obtained FSC (Forest Stewardship Council®) & BPI™ (Biodegradable Products Institute) product certification to provide our customers with authentic and professional-standard certified products.

BPI labeled products are intended to be composted in a municipal or commercial facility. Check with local officials to determine if a program exists in your community.

The mark of responsible forestry

NATURE'S CHOICE™ | FSC Certified Paper Products

We have chosen to use FSC® Certified paper in our Natures Choice™ product offering, along with the requirements of BPI certification for compostability, to help us with our quest toward sustainability. McNairn defines "sustainability" as a means of meeting the needs of the present without compromising the ability of future generations to meet their own needs. Nature's Choice™ products are a reflection of our commitment to this principle.

Our quest begins with the resources our products originate from. Our FSC® labeled products are independently certified to assure consumers that they come from responsibly managed forests that meet the social, economic and ecological needs of the present and future generations. This offering is a result of our continuous improvement efforts to reduce our impact on the environment. We've chosen products for this line that represent the best environmentally friendly offerings possible, such as our greaseproof products that are produced without fluorocarbons

Obtaining FSC® certification is important to us because forests provide fresh air, clean water and also help combat global warming. They provide shelter, food, medicine and important natural resources such as timber and paper. If managed responsibly, forest and plantations benefit indigenous people, the global community and the environment. We must all do our part to protect our environment and we are starting with the forest.

BPI certification assures you that this product can be returned to the earth to nourish another lifecycle. BPI products are intended to be composted in a municipal or commercial facility. Check with local officials to determine if a program exists in your community.

GREASE RESISTANT SANDWICH BAGS-FSC CERTIFIED

Grease resistant sandwich bags provide performance and economy.

LOOKING NATURAL™

Sometimes "Being Natural" is not the issue. You need to "Look Natural."

We recognize that brown paper looks natural because it is an earth tone. So for those of you who just need to "Look Natural", we offer items made from natural kraft paper. Rest assured that our paper based products are made from a renewable resource, TREES! Natural brown papers can be made by ECF methods (Elemental Chlorine Free) and will biodegrade. These are also recyclable when free of barrier coating or food residue. Recyclability and compostability are ultimately subject to adequate facilities existing in your locale. Our natural brown products are FDA approved for food contact.

SANDWICH WRAPS

McNairn Packaging offers a complete and innovative line of specialty sandwich wraps for hot and cold prepared foods that meets the high demands of an ever-changing, food service industry. Custom printing is available to enhance your product's presentation which is an important step in brand name recognition.

XTREME WRAP® - "FRESH & GOOD"

Xtreme Wrap® is a great insulating wrap that you can use in the microwave. Constructed of two outer paper layers and a third inner layer of poly pattern laminated to create insulating air pockets, this sheet also has a release coating to help keep the bun, bread or tortillas from sticking to the paper. Printed with an inviting "Fresh & Good" design, it will complement whatever items you package in it.

INSUL WRAP™ FOIL TO PAPER LAMINATION SANDWICH WRAP

Insul Wrap™ is a premium product that has superior heat retention qualities. The foil-paper lamination pattern used for this product creates air pockets between the two layers. Insul Wrap™ also has great deadfold characteristics—what you wrap stays wrapped—and is grease, moisture and stain resistant. For a value added benefit, we offer stock printed patterns in various colours for easy identification of different food products. Custom printing is also available.

PATTY PAPER

McNairn Packaging offers a premium patty paper for protecting fresh hamburger meat. Because this paper has grease and moisture resistant properties, patty paper can also be used as an interleaver for cheese and deli meat which makes it perfect for use in supermarkets, delis, and grocery stores. Recommended for fresh patties for manual use.

---------------	--------	--------------	---------	----	------	----	-----

BUTCHER KRAFT PAPER

McNairn Packaging has several options for butcher paper all with good blood and water hold-out properties. This enhanced paper also has high tear and burst resistance characteristics, even when wet. These characteristics help to keep bones from piercing the wrap, protecting both the contents and other nearby items from contamination. Reddish colour.

STEAK PAPER- AG-CAN APPROVED

McNairn Packaging offers a variety of steak paper that is ideal for displaying beef, poultry, and pork. Our specially treated steak paper absorbs excess meat juices and prevents moisture from leaking through the sheet. The results increase the display life of meat by preserving its colour and moisture content.

BLACK STEAK PAPER

A dramatic impact sheet that enhances appearance, denotes premium quality and entices the customer to purchase preferred products.

INSUL WRAP®

A pattern lamination in our Foil Insul Wrap® creates air-pockets to keep the heat in as well as keep foods moist longer than other wraps. This combination of foil and paper has great dead-fold characteristics, ensuring your food will stay wrapped.

12" x 12"	900801	770238908019	1.5M	99	33/3	11	.37
-----------	--------	--------------	------	----	------	----	-----

AUTOMATIC BAG

A flat bottom style bag which will stand on its own or can be held and opened with one hand while using the other hand to fill. Also known as an S.O.S. or Self Opening Style bag.

BACK SEAM

The glued join at the back of the bag.

BASIS WEIGHT

The weight in pounds of one standard ream of paper, specifically 500 sheets at 24" x 36".

BOTTOM SEAM

The glued fold over at the bottom of the bag.

BIODEGRADABLE

Degradation results from the action of naturally occurring microorganisms, moisture and oxygen.

BPI

Biodegradable Products Institute

COATINGS

Wax, polyethylene film, poly/wax blend, colour, etc.

COMPOSTABLE

Materials are solid biodegradable substances that decay into a nutrient rich, reusable material under controlled conditions in a commercial composting facility.

DEADFOLD

Once wrapped/closed does not come undone. A strong characteristic of foil Insul Wrap®.

DIE CUT

Circular, rectangular, and other shapes of a variety of materials including waxed papers and laminations of foil to paper or paperboard.

DRY WAX

Wax is applied to the paper in a process whereby the wax penetrates into the paper with little or no wax on the surface leaving a "dry" appearance, making this paper moisture and grease resistant.

ENVIROBAKE®

A premium release pan liner with a natural earth hue, which contains an environmentally safe release agent, and is chromium and chlorine free.

FREEZER PAPER

A special polyethylene coated paper that provides excellent protection for beef, pork and fish by locking in the natural juices while preserving flavour and providing protection from freezer burn.

FSC

© 1996 Forest Stewardship Council A. C.

GENUINE VEGETABLE PARCHMENT

Made from pure cellulose, this paper has strong wet strength properties and performs well when exposed to moisture and grease.

GLASSINE

A transparent, grease resistant printable paper commonly used for bread bags, cookies, confectionery and postal service

GREASEPROOF

Any paper that has superior resistance to penetration of fats or grease and does not stain. This state can be attained mechanically through refining, or by chemical treatment.

GREASE RESISTANT

Any paper that has good to very high oil and grease resistance.

GUSSET

The side panel of a bag that is pleated. For size, measure from the edge of the front panel to edge of back panel

INSUL WRAP™

Aluminum foil pattern laminated to paper. A premium material providing a superior barrier to moisture and grease, along with great deadfold characteristics and excellent heat retention.

INTERFOLDING

Sheets folded into each other. Sheet length is 10-3/4" and widths available from 5" to 60". Product available in a dispenser type carton where sheets can be pulled out one at a time.

LAMINATE

Process of bonding one layer to another layer. Materials may be plastic, foil or paper.

LIP

The cut out portion at the front of the top opening of a bag that provides ease of opening. When measuring a bag, measure from bottom of lip (lip not included) to bottom of bag.

MEMORY

Refers to folding characteristics, where more means product will stay wrapped, and less means product could come unwrapped.

MF

Machine Finish. Relatively rough, toothy surface, an on-machine steel-calendered finish.

MG

Machine Glaze. Smooth, hard surface achieved on a Yankee drier.

MVTR

Moisture Vapour Transmission Resistance of a material to water vapour penetration. Also known as WVTR (Water Vapour Transfer Rate), this property is measured by Tappi TM523.

PANEL BAG

A bag that has a clear panel that runs from the top to bottom of bag. This allows the product to be seen without having to be touched. Commonly used in bread bags.

PATTY PAPER

Hygienic interleaving paper for use between meat patties, where the patties are formed manually. Can also be used as interleave between small slices of cooked meats and cheese slices. NOT recommended for use on high-speed automatic meat patty forming machinery.

PATTY PAPER FORMATIC

Developed specifically for use on fully automatic high-speed meat patty forming machinery. Available in several sizes and hole punched for use on machines such as the Hollymatic or plain for use on Formax type machines.

PATTY PAPER DOUBLE FORMATIC

Developed specifically for use on fully automatic high-speed meat-forming machinery. Two sheets of paper laminated together to ensure easy frozen release. Available in several sizes and hole punched for use on machines such as the Hollymatic or plain for use on Formax type machines.

PEACH STEAK PAPER

A peach coloured sheet or roll with unique blood and water hold out properties for wrapping meats and other moist items. With its high tear and burst resistance, this product helps to prevent bones from piercing through the wrap.

POLYETHYLENE FILM

A high-density film that has strong grease and moisture resistant characteristics. Product is interfolded and packaged in a dispenser type carton.

QUILON

A special coating that provides good wet strength and release. Used as a bakery pan liner and as an interleaver for dough products.

RELEASE

A characteristic that refers to how a product adheres to the material being used. An example would be silicone pan liner which has excellent release.

SCALE PAPER

Usually a waxed sheet that is placed on a scale to prevent the food from touching it when being weighed.

SEMI WAX

A specialized waxed paper that contains release and wet strength characteristics.

SHEETING

Process whereby machine takes up to 16 rolls at a time and cuts product into large sheets up to a maximum length of 65".

SILICONE COATED PARCHMENT

A natural, biodegradable and acid free product that is stronger wet than dry, taste and odour free, heat resistant and is the least flammable paper (will not burn or char easily). Kosher approved and Pareve in accordance with Jewish Dietary Law requirements – Star K.

SLEEVE

A product in the style of a bag that has an open top and side.

SLITTING & REWINDING

Process whereby machine will slit a large roll into the required width or multiple widths. Maximum width capacity of 72".

S.O.S. BAG

Self-opening style bag also referred to as automatic bakery bag. Hold and open with one hand and fill with the other or will stand open on counter with square bottom feature.

STEAK PAPER

A treated product used as a tray liner and an interleaving sheet between pieces of freshly cut meats for display in refrigerated display cases. Also serves as a scale paper in wrapping process.

WAXED ONE SIDE

For protective wrapping of meat, poultry, and fish as the waxed side is in contact with the food while the uncoated side can be used to note the weight and/or price with a writing instrument.

WAX TWO SIDES

W2S is often referred to as "double coated" or "wet waxed" because a heavy coating of wax is applied to both sides of the paper. It is widely used in meat packing plants and wholesale and retail meat outlets.

WET WAX

Process of waxing whereby the paper is dipped through the wax bath to ensure wax is applied to both sides.

WET STRENGTH

Physical property of the paper that indicates its residual strength after being saturated with water.

WHITE KRAFT

An uncoated white paper available in an MF (machine finished) or an MG (machine glazed) finish. Available in various weights.

WINDOW BAG

A bag that contains a clear window that runs from the lip at the opening of the bag to the bottom of the bag. Otherwise referred to as a panel bag. Commonly used for bread bags.

*GREEN SCORECARD

DEFINITIONS

Renewable Resources are made from readily available crops such as trees, corn, wheat and sugar which can be harvested and replanted.

Products made from renewable resources include paper, PLA and Bagasse which are also biodegradable and compostable.

Compostable materials are solid biodegradable substances that decay into a nutrient rich, reusable material under controlled conditions in a commercial composting facility.

Recyclable materials can be reprocessed and used again to manufacture other products. Paper and plastic are typically recyclable when correctly sorted and handled by an agent who classifies and directs the materials properly.

Biodegradable materials are organic liquid or solid substances which will degrade as a result of natural bacterial activity and will disappear into the environment over a period of time.

Recyclability and compostability are ultimately subject to adequate facilities existing in your locale.

All base papers used to make McNairn Packaging products are ECF (Elemental Chlorine Free).

* **GREEN** to McNairn Packaging means sustainability, a common sense systems concept of “meeting the needs of the present without compromising the ability of future generations to meet their own needs” as stated by the World Commission on Environment and Development in 1987. Green to McNairn means the continuous improvement of our products and processes to reduce our impact on the environment.

BPI CERTIFIED

* Compostable Products

McNair Packaging reinforces its commitment

to offering sustainable products with the award of its most recent product certification from BPI (Biodegradable Products Institute). BPI is a professional association of key individuals and groups from government, industry and academia, which promotes the use and recycling of compostable materials via composting in large scale facilities.

McNair's offering includes select bags and wraps from the following:

- Bleached Grease Resistant with a maximum 19# basis weight (Formula 072409-A)
- Natural Dry Wax with a maximum 24# basis weight (Formula 072409-B)
- Bleached Dry Wax with a maximum 21# basis weight (Formula 072409-C)

This certification, along with the renewable materials we use, helps us to close the loop between source and end of life cycles.

BPI products can be located throughout our catalog. Look for the BPI logo.

* **BPI** labeled products are intended to be composted in a municipal or commercial facility. Check with local officials to determine if a program exists in your community.

CUSTOM PRINTING

Many of our products can be custom printed. Contact your McNairn representative for details.

One proof is allowed at no extra charge. Alterations may require additional charges. Quotes are only valid for 60 days from the quoted date. Please send all final artwork in electronic format - Macintosh platform preferred in Illustrator or Indesign. Electronic files will be pre-flighted/checked within 24 hours of file receipt and any problems will be conveyed to the customer within 48 hours.

*Die lines must be obtained from McNairn Packaging. NO EXCEPTIONS.

Customer proofs will be provided electronically via email or real-time, on-line proofing system and are not to be used for colour, only design layout and/or placement within a die-line. Draw-downs/Swatches must be approved for all final artwork to proceed to press. Spot cut designs require a 1/4" dead area on all four sides of sheet. Custom prints available, minimums applicable.

PRINTING SPECIFICATIONS

- All printing is flexographic using water based inks.
- Line screen 65 - 120. Standard is 85
- Standard 4 color. 5 color available on select equipment.
- Minimum dot 3%
- Registration Tolerance: +/-1/16"
- Trapping Specs: .020" where possible or half-way under keylines
- Type/Line Specs: 5pt. For positive copy, 9pt. for reverse copy, 2pt. positive/negative keyline
- Spot Cut Maximum: 15" x 20" Final Sheet Size

FSC COC CERTIFICATION & BPI CERTIFICATION

The mark of responsible forestry

McNairn Packaging has achieved Forest Stewardship Council™ (FSC) chain of custody certification in our quest to satisfy our goal of producing packaging from well-managed forests for our customers. Chain of Custody links the certified forest to end user products and tracks the path of the raw materials from the forest to the consumer through all the stages of processing. The FSC certification is a promise that the product comes from well-managed forests and we are audited to ensure compliance. More information can be found at www.fsc.org.

BPI labeled products are intended to be composted in a municipal or commercial facility. Check with local officials to determine if a program exists in your community.

SPC MEMBER SUSTAINABLE PACKAGING COALITION

The SPC is an industry working group inspired by cradle to cradle principles and dedicated to creating a robust environmental vision for packaging. Through informed design practice, supply change collaboration, education, and innovation, SPC strives to transform packaging into a system that encourages an economically prosperous and sustainable flow of materials creating lasting value for present and future generations.

McNairn Packaging is a focused manufacturer, servicing the packaging needs of our target markets: food service, supermarket, bakery, and food processing. Our products are proudly supplied to our end users through leading distributors of packaging and food service products across North America. We provide first class customer service, develop and maintain world class operational capabilities and always meet with distinction, Customer Specified Quality and Food Safety standards as well as the industry standards of ASI and HAACP.

McNairn Packaging is conveniently located with manufacturing facilities in Whitby, Ontario, Westfield, MA, and Phoenix, AZ. McNairn is always striving to improve performance, always seeking continuous process improvement, thus providing customer confidence in maintaining positive, mutually beneficial long-term relationships.
