Make room for pleasure, quite simply!

In an often busy daily life, taking the time to enjoy a cone, an ice cream, or a classic snack-bar becomes a true moment of comfort. These tasty breaks matter, both for your customers and for you.

At Carrousel, we know how much these moments make a difference. That's why we develop and select packaging solutions and food products specifically curated for the reality of ice cream shops, snack bars and food trucks.

As a family-owned Québec company, we have supported this sector for several decades with real-world expertise and a consistent commitment to your success.

In this catalog, you will find a clear identification of products made in Québec and Canada, a concrete way to prioritize local purchasing, support the local economy and offer your customers memorable gourmet delights.

A recyclable package is one that is collected in the recycling bin, sorted at a sorting facility, and actually recycled—meaning it is processed and reintroduced into a production cycle to create new products—within an established market.

Although, since January 2025, the vast majority of containers and packaging can be placed in the recycling bin, this does not necessarily mean they are all effectively recycled. Carrousel considers packaging "recyclable" when well-established recycling streams exist in Quebec and Ontario.

A biodegradable product is likely to be completely decomposed by living organisms. ¹ The OECD 301D test protocol (Organization for Economic Cooperation and Development) certifies that a product is biodegradable. If a product has the test procedure logo, it means that at least 60% of the residue left by the product will naturally decompose in less than 28 days. These tests are conducted under optimal laboratory conditions.

Articles displaying this label may be biologically recycled. There are two processes for the biological recycling of organic materials: composting and biomethanization.

The organic waste collection programs vary from one municipality to another, depending on the treatment process in place (composting or biomethanation). To determine whether a product is considered "compostable", Carrousel relied on the Ça va où? application as of March 2025. If a product is accepted in the collection programs of at least two of the following cities—Montreal, Quebec City, and Sherbrooke—Carrousel considers it compostable. However, to ensure that a product is accepted in your local collection, we recommend checking directly on the application or with your municipality.

These products are made in Quebec.

These products are made in Canada.

These products are made from pre- or post-consumer recycled materials.

Unfortunately, there is no Canadian standard for declaring packaging as "reusable." Carrousel has therefore considered items reusable if they can be used and washed multiple times without deteriorating.

These products are freezer-safe.

These products are oven-safe.

These products are microwave safes.

These products can be placed in a heated display.

These products are dishwasher safe.

These products are subject to restrictions linked to regulations on single-use plastic items. See guide on pages 5 and 6.

Clearance items are available while stocks last and will be discontinued thereafter.

Product **codes in blue** mean that these products are not part of our regular inventory and, therefore, cannot be exchanged or refunded. Orders are delivered on average in 15 working days, but can take longer depending on the products.

The **ecological attributes** associated with the products in this catalog were updated on January 29, 2026. They may differ from one municipality to another and change during the year depending on various factors, including technological advances.

List of materials used for packaging

MATERIALS	DESCRIPTION
Bagasse	Bagasse is the fibrous residue from sugar cane once the juice has been extracted. This paper-like material is compostable if it is accepted in your municipal collection.
Cardboard, pulp and paper	Whether paper packaging, cardboard, corrugated cardboard or kraft paper bags, all products made from these materials are generally well recycled in Quebec and Ontario. These items can be composted if heavily soiled, and accepted in your municipal collection.
PET (Plastic number 1)	Polyethylene terephthalate. The recyclability of this plastic is quite good, since there are a number of applications for it. RPET is made from recycled PET.
HDPE (Plastic number 2)	High-density polyethylene. This is the plastic resin most coveted by recyclers.
PLA	PLA, also known as Polylactic Acid, is a plant-based plastic derived from corn starch.
Aluminium	Aluminium containers and packaging can be recycled endlessly.
PVC (Plastic number 3)	Polyvinyl chloride. Low recyclability, due to the presence of numerous additives.
LDPE (Plastic number 4)	Low-density polyethylene. Used mainly for plastic bags, it has low recyclability.
PP (Plastic number 5)	Polypropylene. The recyclability of this plastic is quite good, since it can be recycled several times before reaching the end of its life.
PS (Plastic number 6)	Polystyrene. Very low recyclability. Industrial recycling processes are not highly developed and there are few outlets.
Plastic number 7	All other plastics. Not recycled in Quebec.

Guide to single-use plastic items allowed and prohibited

Federal and Montreal regulations

Montreal and the Government of Canada have adopted regulations prohibiting the sale and offer of some single-use plastic products.

Beside is a summary of the targeted articles, sold at Carrousel.

Effective dates

Montreal :
March 28, 2023

Federal:
December 20, 2023

-  Allowed
-  Allowed or prohibited according to some criteria or applications, see reverse.
-  Prohibited

		Federal	Montreal
	Checkout bags, including those made of degradable plastic		
	Bags for carrying food in the store (e.g. fruits and vegetables)		
	Reusable plastic shopping bags		
	Stir sticks		
	Cutlery for on-site consumption		
	Cutlery on request for delivery/takeout		
	Straws		
	Foam foodservice ware (expanded or extruded)		
	Black food containers for food or beverage that is ready to be consumed		
	Black food containers for food to be reheated or not ready to eat		
	Foodservice ware and cups made of non-black, non-expanded or extruded plastic		
	Food containers and tableware made of non-black plastic		
	Foodservice ware made of compostable plastic (including PLA)		
	Cups and lids made of any non-black plastic		
	plastic lids		

Notes

Federal Regulation

Reusable plastic shopping bags

Bags meeting the following criteria are accepted:

- don't break if they are used to carry 10 kg over a distance of 53 m 100 times;
- don't break if they are washed in accordance with the washing procedures specified for a single domestic wash (standard ISO 6130).

Cutlery and straws

Plastic utensils and straws meeting the following criteria are accepted as they are considered reusable:

- not made of polystyrene or polyethylene;
- can tolerate 100 wash cycles in a household dishwasher.

Flexible straws

Some exceptions will be in effect for flexible straws. See the federal regulation on this subject.

Foam foodservice ware (♻️ expanded or extruded)

They are allowed only if they are trays and are used to package food that is not ready to be eaten (e.g. vegetables, meat, fish)

Black food containers

Only black containers meeting the following criteria are accepted:

- contain foods that need to be prepared (baking in the oven, heating in a microwave or toaster) before they can be eaten or meat and fish that are not ready to eat or vegetables;
- are not made of foam (♻️ expanded or extruded) or PVC.

Compostable plastic foodservice ware

It is important to differentiate between compostable plastic, such as PLA, and "oxo-degradable plastic", which is prohibited. Also note that all black packaging is prohibited, even if it is compostable plastic.

Cups and lids

Foam cups (♻️ expanded or extruded) as well as black lids and black cups are prohibited.

Montreal Regulation

Businesses affected and not affected

The regulation concerns establishments located in the boroughs of Montreal that offer food service or that package food items for retail sale. Excluded are:

- establishments that do not receive consumers in-house and offer only delivery service;
- non-profit organizations whose mission includes food distribution.

Cutlery for delivery/takeout

Utensils made of ♻️ plastic are not permitted under any circumstances.

Foam foodservice ware (♻️ expanded or extruded)

Only trays for packing meat or fish are allowed.

Black foodservice ware

Foodservice ware made of ♻️ plastic (expanded, extruded or not) are prohibited, regardless of their color.

Designed for Precision, Built for Hygiene in Foodservice

Quality and Dependability You can Trust

Titan Foodservice Wipers & Cloths offer effective results across cleaning, disinfecting & sanitizing tasks. By helping reduce contamination risks, improve surface hygiene, and support operational efficiency, they offer professionals the confidence to clean with purpose—every time.

Made to Perform™

Titan® Foodservice Wipers & Cloths are more than just cleaning tools—they are essential in maintaining a clean, compliant, and customer-safe environment. With colour-coded options and unmatched absorbency, they are the future of foodservice hygiene.

Designed for Demanding Foodservice Environments

Colour-Coded Control

Easy-to-identify colours support hygiene protocols by clearly designating cloths for specific areas or tasks, minimizing the risk of cross-contamination.

Sanitizing Made Simple

When paired with approved foodservice sanitizing solutions, Titan® Wipers & Cloths make cleaning and sanitizing fast, effective, and compliant.

Hygienic

Designed to trap and remove food particles and residue from surfaces, helping ensure food safety and cleanliness standards are met.

Absorbent

Quickly soak up water, oils, grease, and fats to keep prep and cooking areas clean and dry.

Washable & Reusable

Engineered for extended use—washable and reusable for added value and reduced waste compared to disposable options.

	Code	Product Name	Description	Wiper Size Length x Width	Units / Case	Units / Pkg	Wipers Per Case
