You know it as well as we do: we live in a tumultuous period where new environmental regulations and inflation dictate the pace of the market. Faced with these challenges, it is reassuring to surround yourself with a trusted partner like Carrousel, a family of professionals who, for decades, have been committed to serving dairy bars with dedication and expertise.

In this catalog, you will discover a carefully chosen selection of packaging and food products that have proven themselves over time. Rediscover your classics, those irreplaceable items that have won the hearts of your customers.

But beyond the essentials, we have also integrated delicious and eco-friendly novelties.

With us, tradition and innovation come together to meet the evolving needs of your business while preserving our environment.

These products can be transformed so as to be reintroduced into a production cycle for the manufacture of new products.

Ces produits sont fabriqués à partir de matières recyclées pré ou post consommation.

A biodegradable product is likely to be completely decomposed by living organisms.³ The OECD 301D test protocol (Organization for Economic Cooperation and Development) certifies that a product is biodegradable.

If a product has the test procedure logo, it means that at least 60% of the residue left by the product will naturally decompose in less than 28 days.

These products can be reused several times without their condition deteriorating.

These products are freezer-safe.

Composting is a biological treatment process that allows for the biodegradation (biooxidation) of organic waste, under the action of aerobic microorganisms (living in the presence of oxygen). The organic waste is first mixed with structuring agents (e.g. wood chips) to increase aeration, then placed in windrows, piles or in a reactor.

Compost is obtained after reaching a thermophilic phase (temperature between 45°C and 70°C) and a subsequent maturation phase. However, it is necessary to check if the products are accepted in your municipality.

These products are oven-safe.

These products are microwave safes.

These products can be placed in a heated display.

These products are made in Quebec.

These products are dishwasher safe.

Clearance items are available while stocks last and will be discontinued thereafter.

Since March 28, 2023, the sale or offer of these products has been prohibited in the boroughs of the City of Montreal. Certain establishments are excluded from these regulations. See details on pages 5 and 6.

Product **codes in blue** mean that these products are not part of our regular inventory and, therefore, cannot be exchanged or refunded. Orders are delivered on average in 15 working days, but can take longer depending on the products.

The **ecological attributes** associated with the products in this catalog were updated on February 29, 2023. They may differ from one municipality to another and change during the year depending on various factors, including technological advances.

List of materials used for packaging

MATERIALS	DESCRIPTION
Bagasse	Bagasse is the fibrous residue from sugar cane once the juice has been extracted. This paper-like material is compostable if it is accepted in your municipal collection.
Cardboard, pulp and paper	Whether paper packaging, cardboard, corrugated cardboard or kraft paper bags, all products made from these materials are generally well recycled in Quebec and Ontario. These items can be composted if heavily soiled, and accepted in your municipal collection.
PET (Plastic number 1)	Polyethylene terephthalate. The recyclability of this plastic is quite good, since there are a number of applications for it. RPET is made from recycled PET.
HDPE (Plastic number 2)	High-density polyethylene. This is the plastic resin most coveted by recyclers.
PLA	PLA, also known as Polylactic Acid, is a plant-based plastic derived from corn starch.
Aluminium	Aluminium containers and packaging can be recycled endlessly.
PVC (Plastic number 3)	Polyvinyl chloride. Low recyclability, due to the presence of numerous additives.
LDPE (Plastic number 4)	Low-density polyethylene. Used mainly for plastic bags, it has low recyclability.
PP (Plastic number 5)	Polypropylene. The recyclability of this plastic is quite good, since it can be recycled several times before reaching the end of its life.
PS (Plastic number 6)	Polystyrene. Very low recyclability. Industrial recycling processes are not highly developed and there are few outlets.
Plastic number 7	All other plastics. Not recycled in Quebec.

Guide to single-use plastic items allowed and prohibited

Federal and Montreal regulations

Montreal and the Government of Canada have adopted regulations prohibiting the sale and offer of some single-use plastic products.

Beside is a summary of the targeted articles, sold at Carrousel.

Effective dates

Montreal : March 28, 2023

Federal: December 20, 2023

 Allowed

 Allowed or prohibited according to some criteria or applications, see reverse.

 Prohibited

	Federal	Montreal
 Checkout bags, including those made of degradable plastic		
 Bags for carrying food in the store (e.g. fruits and vegetables)		
 Reusable plastic shopping bags		
 Stir sticks		
 Cutlery for on-site consumption		
 Cutlery on request for delivery/takeout		
 Straws		
 Foam foodservice ware (expanded or extruded)		
 Black food containers for food or beverage that is ready to be consumed		
 Black food containers for food to be reheated or not ready to eat		
 Foodservice ware and cups made of non-black, non-expanded or extruded plastic		
 Food containers and tableware made of non-black plastic		
 Foodservice ware made of compostable plastic (including PLA)		
 Cups and lids made of any non-black plastic		
 plastic lids		

Federal Regulation

Reusable plastic shopping bags

Bags meeting the following criteria are accepted:

- don't break if they are used to carry 10 kg over a distance of 53 m 100 times;
- don't break if they are washed in accordance with the washing procedures specified for a single domestic wash (standard ISO 6130).

Cutlery and straws

Plastic utensils and straws meeting the following criteria are accepted as they are considered reusable:

- not made of polystyrene or polyethylene;
- can tolerate 100 wash cycles in a household dishwasher.

Flexible straws

Some exceptions will be in effect for flexible straws. See the federal regulation on this subject.

Foam foodservice ware (♻️ expanded or extruded)

They are allowed only if they are trays and are used to package food that is not ready to be eaten (e.g. vegetables, meat, fish)

Black food containers

Only black containers meeting the following criteria are accepted:

- contain foods that need to be prepared (baking in the oven, heating in a microwave or toaster) before they can be eaten or meat and fish that are not ready to eat or vegetables;
- are not made of foam (♻️ expanded or extruded) or PVC.

Compostable plastic foodservice ware

It is important to differentiate between compostable plastic, such as PLA, and "oxo-degradable plastic", which is prohibited. Also note that all black packaging is prohibited, even if it is compostable plastic.

Cups and lids

Foam cups (♻️ expanded or extruded) as well as black lids and black cups are prohibited.

Montreal Regulation

Businesses affected and not affected

The regulation concerns establishments located in the boroughs of Montreal that offer food service or that package food items for retail sale. Excluded are:

- establishments that do not receive consumers in-house and offer only delivery service;
- non-profit organizations whose mission includes food distribution.

Cutlery for delivery/takeout

Utensils made of ♻️ plastic are not permitted under any circumstances.

Foam foodservice ware (♻️ expanded or extruded)

Only trays for packing meat or fish are allowed.

Black foodservice ware

Foodservice ware made of ♻️ plastic (expanded, extruded or not) are prohibited, regardless of their color.
