A catalogue designed for ready-to-eat professionals.

This document brings together a curated selection of essential packaging, hygiene, and sanitation products tailored to the needs of caterers and ready-to-eat retailers. Whether you're serving on-site, preparing for takeout, or shipping your creations, you'll find practical, food-safe solutions that meet industry standards.

A complete offering, so you're never caught off guard.

With Carousel's extensive inventory and wide product range, you can count on having what you need, when you need it. This catalogue is also an opportunity to discover products you may not know we carry, including cleaning equipment and supplies, designed to support a safe and efficient work environment. Our five HACCP-certified branches and experienced team ensure consistent access to reliable solutions that simplify your daily operations.

A recyclable package is one that is collected in the recycling bin, sorted at a sorting facility, and actually recycled—meaning it is processed and reintroduced into a production cycle to create new products—within an established market.

Although, since January 2025, the vast majority of containers and packaging can be placed in the recycling bin, this does not necessarily mean they are all effectively recycled. Carrousel considers packaging «recyclable» when well-established recycling streams exist in Quebec and Ontario.

A biodegradable product is likely to be completely decomposed by living organisms. ¹ The OECD 301D test protocol (Organization for Economic Cooperation and Development) certifies that a product is biodegradable. If a product has the test procedure logo, it means that at least 60% of the residue left by the product will naturally decompose in less than 28 days. These tests are conducted under optimal laboratory conditions.

Articles displaying this label may be biologically recycled. There are two processes for the biological recycling of organic materials: composting and biomethanization.

The organic waste collection programs vary from one municipality to another, depending on the treatment process in place (composting or biomethanation). To determine whether a product is considered «compostable», Carrousel relied on the Ça va où? application as of March 2025. If a product is accepted in the collection programs of at least two of the following cities—Montreal, Quebec City, and Sherbrooke—Carrousel considers it compostable. However, to ensure that a product is accepted in your local collection, we recommend checking directly on the application or with your municipality.

These products are made in Quebec.

These products are made in Canada.

These products are made from pre- or post-consumer recycled materials.

Unfortunately, there is no Canadian standard for declaring packaging as «reusable.» Carrousel has therefore considered items reusable if they can be used and washed multiple times without deteriorating.

These products are freezer-safe.

These products are oven-safe.

These products are microwave safe.

These products can be placed in a heated display.

These products are dishwasher safe.

These products are subject to restrictions linked to regulations on single-use plastic items ([click here to view the Guide](#)).

Clearance items are available while stocks last and will be discontinued thereafter.

Product **codes in blue** mean that these products are not part of our regular inventory and, therefore, cannot be exchanged or refunded. Orders are delivered on average in 15 working days, but can take longer depending on the products.

The **ecological attributes** associated with the products in this catalog were updated on September 30, 2025. They may differ from one municipality to another and change during the year depending on various factors, including technological advances.

List of materials used for packaging

MATERIALS	DESCRIPTION
Bagasse	Bagasse is the fibrous residue from sugar cane once the juice has been extracted. This paper-like material is compostable if it is accepted in your municipal collection.
Cardboard, pulp and paper	Whether paper packaging, cardboard, corrugated cardboard or kraft paper bags, all products made from these materials are generally well recycled in Quebec and Ontario. These items can be composted if heavily soiled, and accepted in your municipal collection.
PET (Plastic number 1)	Polyethylene terephthalate. The recyclability of this plastic is quite good, since there are a number of applications for it. RPET is made from recycled PET.
HDPE (Plastic number 2)	High-density polyethylene. This is the plastic resin most coveted by recyclers.
PLA	PLA, also known as Polylactic Acid, is a plant-based plastic derived from corn starch.
Aluminum	Aluminum containers and packaging can be recycled endlessly.
PVC (Plastic number 3)	Polyvinyl chloride. Low recyclability, due to the presence of numerous additives.
LDPE (Plastic number 4)	Low-density polyethylene. Used mainly for plastic bags, it has low recyclability.
PP (Plastic number 5)	Polypropylene. The recyclability of this plastic is quite good, since it can be recycled several times before reaching the end of its life.
PS (Plastic number 6)	Polystyrene. Very low recyclability. Industrial recycling processes are not highly developed and there are few outlets.
Plastic number 7	All other plastics. Not recycled in Quebec.

Everything for catering professionals... and so much more!

Carrousel is your trusted partner for all your event service and take-out needs. In addition to our well-known packaging solutions, did you know we also offer a wide range of products to make your daily operations easier and enhance your customer experience?

FOR A CLEAN AND SAFE WORK ENVIRONMENT

Dish soap

Surface cleaners

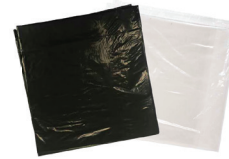

Hand and toilet paper

Gloves

Caps and hairnets

Garbage bags

FOR SHOWCASING YOUR DISHES

Disposable or reusable plates

Disposable or reusable utensils

Hot and cold beverage cups

Appetizer sets

Napkins

ENHANCE YOUR FLAVORS

Add a unique touch to your dishes with our selection of spices, marinades, oils and vinaigrettes. Everything you need to elevate your creations with ease.

KEEP YOUR FOOD SAFE UNTIL IT REACHES YOUR CUSTOMER

Ensure secure delivery of your dishes with our sturdy shipping boxes and insulated containers, perfect for keeping food fresh.

FOR ON-SITE SERVICE OR TAKE-OUT PACKAGING

Prepared-meal containers

Serving trays and bowls

Secure and standard deli containers

Catering pans

Portion containers

Vacuum bags

Glass jars

Take-out containers and lunch boxes
