Which can be transformed so as to be reintroduced into a production cycle for the manufacture of new products. It is necessary to check whether the products are accepted in your municipality.

Pre-consumer recycled contents are materials that are redirected from the disposal stream during the manufacturing process and introduced for use in a different industrial manufacturing process.

A biodegradable product is likely to be completely decomposed by living organisms.³ The OECD 301D test protocol (Organization for Economic Cooperation and Development) certifies that a product is biodegradable.

If a product has the test procedure logo, it means that at least 60% of the residue left by the product will naturally decompose in less than 28 days.

Post-consumer recycled contents are materials that are generated by homes or commercial, industrial or institutional installations (in their role as end-users of a product), which can no longer be used for their original purpose.

These products can be reused several times without their condition deteriorating.

Composting is a biological treatment process that allows for the biodegradation (biooxidation) of organic waste, under the action of aerobic microorganisms (living in the presence of oxygen). The organic waste is first mixed with structuring agents (e.g. wood chips) to increase aeration, then placed in windrows, piles or in a reactor.

Compost is obtained after reaching a thermophilic phase (temperature between 45°C and 70°C) and a subsequent maturation phase. However, it is necessary to check if the products are accepted in your municipality.

These products are freezer safe.

These products are oven safe.

These products are microwave safe.

These products are made in Quebec.

These products can be placed in a heated display.

Clearance items are available while stocks last and will be discontinued thereafter.

These products are dishwasher safe.

Product codes in blue mean that these products are not part of our regular inventory and, therefore, cannot be exchanged or refunded. Orders are delivered on average in 15 working days, but can take longer depending on the product.

The **ecological attributes** associated with the products in this catalog were updated on October 2, 2023. They may differ from one municipality to another and change during the year depending on various factors, including technological advances.

DISHWASHER SAFE

REUSABLE

La Tasse is an initiative of the NPO La vague. It is a system of returnable cups, distributed in a network of more than 400 businesses across Quebec. Consumers get their cup in exchange for a 5 deposit, refunded when it is returned to any participating establishment. The cup is then washed and recirculated. For more information, visit <https://www.la-vague.ca/la-tasse>.

Reusable PP container La boîte

CODE	DESCRIPTION	QUANTITY
7013003	6.77"x6.77"x1.89"	50/case

La boîte is a system of returnable containers distributed in a network of businesses across Quebec. Consumers obtain their container in exchange for a 7 deposit, which is refunded when it is returned to any participating establishment. The container is then washed and put back into circulation. For more information, visit <https://www.la-vague.ca/la-boite>
